Click **Login**.

Change i-Token Personal Identification Number (PIN)

6

Click **Agree** after reading the **Digital Security Awareness**.

7

Enter i-Token PIN.

Change i-Token Personal Identification Number (PIN)

The screenshot shows a mobile application interface for changing an i-Token PIN. At the top, there is a red header with a back arrow and the text 'Change i-Token PIN'. Below the header, the screen displays 'Enter i-Token PIN' followed by 'Cyberbanking Account No. XXXXXXXXXXXX'. A red box highlights the input field labeled 'Enter i-Token PIN'. Below this field is a link that says 'Forget i-Token PIN'. At the bottom of the screen, a red box highlights a 'Proceed' button.

Click **Confirm**.

8

Enter your i-Token PIN, then re-enter your i-Token PIN.

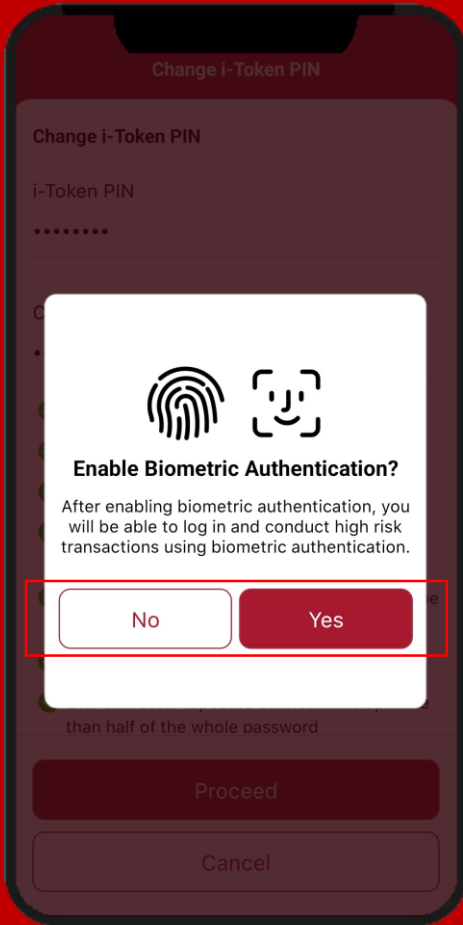

The screenshot shows the same mobile application interface as in step 7, but at a later stage. The red header still says 'Change i-Token PIN'. Below it, there are two input fields, both highlighted with red boxes. The first is labeled 'i-Token PIN' and contains the text 'Enter i-Token PIN'. The second is labeled 'Confirm i-Token PIN' and contains the text 'Re-enter i-Token PIN'. Below these fields is a list of seven requirements for the PIN, each preceded by an unchecked radio button: 'Must contain 8 to 12 characters', 'Must contain letter(s) and number(s)', 'No spaces or special characters', 'Must contain no more than 2 of the same character and no consecutive characters', 'The same combination of characters cannot be used more than twice', 'Max 4 sequential keyboard characters', and 'One character repeated cannot make up more than half of the whole password'. At the bottom, a red box highlights a 'Proceed' button, and below it is a 'Cancel' button.

Click **Proceed**.

9

Select **Yes** or **No** to enable your **Biometric Authentication**.

Change i-Token Personal Identification Number (PIN)

10

Change i-Token PIN is completed.
